## Déploiement OSPF/BGP routeurs

## Configuration de **EDGE1** (Routeur principal)

#### 1. Interfaces :

- Interface Loopback0 utilisée pour OSPF et BGP avec l'adresse 191.5.157.34.
- Interfaces physiques GigabitEthernet0/0 et GigabitEthernet0/1 sont configurées pour différents sousréseaux et VLANs.
- Interface GigabitEthernet0/0.13 avec VLAN 13 pour la connexion au fournisseur et la configuration NAT.
- Interface GigabitEthernet0/0.14 pour l'adresse IP publique (VLAN 14).
- Interface GigabitEthernet0/1.30 pour la connexion iBGP à EDGE2.

#### 2. Protocoles de routage :

- OSPF: Le routeur annonce les réseaux 10.5.254.0 et 10.5.254.8 dans l'area 5.
- BGP: Peers avec 10.5.254.18 (autonome 65516) et 91.5.222.98 (autonome 65530).

#### 3. Routage statique:

Des routes statiques sont configurées pour divers sous-réseaux (par exemple, 10.5.0.0/24, 10.5.10.0/26, etc.), toutes pointant vers l'interface 10.5.254.10.

## Configuration de **EDGE2** (Routeur secondaire)

#### 1. Interfaces :

Configurations similaires à EDGE1 avec plusieurs interfaces pour différents VLANs (par exemple, GigabitEthernet0/0.15) pour le fournisseur avec le sous-réseau 10.5.254.6 et
 GigabitEthernet0/1.30 pour la connexion iBGP avec EDGE1).

#### 2. Protocoles de routage :

- OSPF: Le routeur annonce les réseaux 10.5.254.4, 10.5.254.12 et 31.5.126.12.
- BGP : Annonce du réseau 10.5.254.12/30 pour la connexion à EDGE1, ainsi que le réseau 31.5.126.12/30.

#### 3. Routage statique:

• Routes similaires à EDGE1 pour acheminer le trafic vers les différents sous-réseaux.

# Configuration de WANRTR (Routeur pour la gestion des VLANs internes et de la connectivité Internet)

#### 1. **VRF**:

- INET et MAN sont deux VRF (Virtual Routing and Forwarding) utilisés pour isoler les routes de chaque domaine.
- Chaque interface est associée à l'une de ces VRF pour séparer les flux réseau.

#### 2. Interfaces:

- Des interfaces VLAN (par exemple, GigabitEthernetθ/θ.15 pour MAN VLAN 15 et GigabitEthernetθ/θ.16 pour INET VLAN 16).
- Interface FastEthernet0/1/0 connectée à l'Internet Provider avec une adresse IP 8.8.5.14.

#### 3. Protocoles de routage :

- OSPF pour annoncer les sous-réseaux dans les VRF MAN et INET.
- BGP pour la gestion des annonces de route entre le routeur et les voisins (31.5.126.13 et 91.5.222.97).

#### Configuration de **EDGE1**:
